

Help Save the Honey Bees *without becoming a beekeeper.*

In May and June most honey bee colonies swarm. Half the colony and the queen take off in search of a new home. Only 20% of these swarms will survive.

Put up a bait hive on your property and call us if bees move in. We'll take the bees, give them what they need for their best chance of survival, and bring you back your hive.

YOU WILL MAKE THE DIFFERENCE!

\$75

A bait hive is a temporary home for a swarm. If conditions are right, swarms move right in with no help from anyone.

*Personalize your bait hive.
Turn it into lawn art.
Make it a family project.
Tell your friends all you're learning about honey bees.
Give a unique gift.*

\$60 - (undecorated)

Bait Hives Introductory offer: \$60 or \$75
